Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/735,414

Applicant(s)

DETTMANN ET AL.

Examiner

Isiaka O. Akanbi

Art Unit

2877

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 2, 4, 7- 18 is/are rejected.
- 7) ☒ Claim(s) 3,5,6 and 19-21 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 22 December 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement file 10 May 2004 has been entered and reference considered by the examiner.

Drawings

The examiner approves the drawings filed 12 December 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, 7, 13-14 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Danko (6,879,391 B1).

As regard to claims 1, 7 and 13, Danko discloses a method for inspection of periodic structures on a lithography mask using a microscope with adjustable illumination and an operating element used for movement of a mechanical stage wherein the lithography mask is attached to the mechanical stage in order to record images of the lithography mask at a computer-controlled location on the lithography mask, wherein a position, a size and a pitch specification of the mask are stored comprising of the following:

calibrating a first image of each array structure for selected locations on the lithography mask (fig. 1), calculating Fourier coefficients at a reference point of an array/diffraction grating (63), calculating a residual image (63) from a difference between an original image of the array structure and a Fourier expansion and forming a threshold value for the calculation of an image indicating an error (col. 4, line 35-50)(col. 6, line 22-col. 7, line 1-67).

As to claims 2 and 18, Danko discloses wherein the calibrating is carried out by determining a mask rotation and determining a magnification (fig. 1)(col. 6, line 57-col. 7, line 1-55).

As to claim 4, Danko discloses wherein a frequency filter is used to reduce curling in the residual image (col. 2, line 21-32).

As to claim 14, Danko discloses repairing the lithography mask based upon results of the inspecting (fig. 1)(25).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 9, 10, 11, 12 and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Danko (6,879,391 B1) in view of the admitted prior art of applicant.

As to claims 8-10, Danko discloses the claimed invention, as applied to claim 7 above, except for is silent regarding wherein the lithography mask comprising a chromium mask, a half-tone mask or an interference mask, however the applicant discloses (col. 0054, line 1-3) that this is a well known. Therefore it would have been obvious to one having ordinary skill in the art at the time of invention to incorporate the teachings of Danko in conjunction with applicant indication of feature to provide a lithography mask that may be a chromium mask, a half-tone mask or an interference mask to meet the terms of the claims for the purpose of inspection and repairing. (see In Ex parte McGaughey, 6 USPQ2d 1334, 1337 (Bd. Pat. App. & Int. 1988).

As to claims 11-12 and 15-17, Danko discloses the claimed invention, as applied to claim 7 and 14 above, except for is silent regarding wherein the repairing is carried out by means of ion etching or by use of an atom microscope for microprocessing of the lithography mask, however the applicant discloses (col. 0056, line 1-3) that this is a well known. Therefore it would have been obvious to one having ordinary skill in the art at the time of invention to incorporate the teachings of Danko in conjunction with applicant indication of feature to carried out by means of ion etching or by use of an atom microscope for microprocessing of the

lithography mask to meet the terms of the claims for the purpose of inspecting and repairing lithography mask. Further, it would have been obvious to one having ordinary skill in the art at the time of invention to effect the semiconductor substrate comprising of forming a portion of an array of memory cells for the purpose of inspecting and repairing lithography mask. (see In Ex parte McGaughey, 6 USPQ2d 1334, 1337 (Bd. Pat. App. & Int.1988).

Allowable Subject Matter

Claims 3, 5-6, 19, 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As to claim 3, the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein a rotation angle and a magnification factor are chosen such that a magnitude of the associated Fourier coefficient is a maximum.

As to claims 5 and 20, the prior art of record, taken alone or in combination, fails to disclose or render obvious determining a mean value of an error in a line width by forming an average value over all the measurement points and rejecting the lithography mask if the error in the line width is greater than the predetermined threshold value, further the prior art of record, taken alone or in combination, fails to disclose or render obvious converting the Fourier coefficients to a line width value by means of back-transformation and a predetermined intensity threshold value. Claim 6 and is allowable by virtue of its dependency on claim 5.

As to claim 21, the prior art of record, taken alone or in combination, fails to disclose or render obvious measuring the width of the image lines and the image lines separations by use of Fourier analysis.

Additional Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed in the attached form PTO-892 teach of other prior art a method for inspection of periodic structures on a lithography mask using a microscope that may anticipate or obviate the claims of the applicant's invention.

Conclusion

Fax/Telephone Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isiaka Akanbi whose telephone number is (571) 272-8658. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley Jr. can be reached on (571) 272-2800 ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
